

HOW DO LINWOOD MATERIALS SAVE ME MONEY?

Using a Cedar Designs/Linwood home package or kit means that you are guaranteed to get a quality result the first time – without costly errors. You also get the right amount of Linwood product to do the job, backed up by outstanding warranties. You get:

HI-LINE FRAMING LUMBER

Saves money on construction labor with less waste and better, finished results (such as dry-walling, painting, installation of cabinetry and trim).

CEDAR SIDING

Manufactured to the highest possible specifications. Our product is 20% thicker, easier to install, has more coverage and better appearance. (Maintenance-free siding options are also available.)

BRAND NAME WINDOWS & EXTERIOR DOORS

Meets Linwood standards for performance and appearance. Available in vinyl with a clear hemlock jamb liner, metal-clad wood and fiberglass. Has the highest energy-efficiency rating. A full range of shapes and sizes are available.

EXPOSED TIMBERS

Gives a true vaulted interior. Douglas fir glu-lam beams give greater structural strength, better appearance, matching sizes, and are sealed for maximum protection. Engineered hardware is included.

PREMIUM PLYWOOD

Half-inch sheathing allows direct application of siding and roofing materials. Full three-quarter inch tongue and groove plywood allows for direct application of flooring.

ROOFING & FLOOR STRUCTURE

Solid lumber permits maximum design flexibility, provides easier installation, efficient roof venting and the highest possible insulation values. (Optional engineered wood floor systems are available.)

FASCIA, SOFFIT & TRIM

Top quality cedar fascia and soffit give more protection and better appearance.

ROOFING MATERIALS

Brand name fiberglass shingles with a lifetime limited warranty. Complete with roofing paper, ice and water shield, venting and full metal flashing in a wide choice of colors. (Multiple upgrade options are available.)

WIDE SELECTION

Many product options are available to give you everything you need to build a true custom home.

Ask for detailed proof if a builder says they can supply and build your new home cheaper than using a Cedar Designs / Linwood design and material package.
